Orbit Digital

Response to RFP NW-2025-014: Vendor Onboarding Platform for Northwind Logistics

1. Executive Summary

Orbit Digital has spent twelve years helping logistics and retail companies modernise supplier management. We understand Northwind's need for a trustworthy, scalable onboarding platform and bring a team that has done this many times before.

2. Proposed Solution and Approach

Our platform covers vendor registration, document collection, risk screening and approval workflows. It will be integrated with your existing systems using standard APIs, and our team will work with your IT department to determine the best approach during the project. Technical details will be finalised in the design phase.

3. Timeline, Team and Milestones

The project is expected to take around 26 weeks, depending on the complexity of the integrations. We will provide a project manager, a technical lead and a team of engineers. Milestones will be agreed at kickoff.

4. Pricing

Our pricing is based on a three-year term. Integration work is covered by an allowance until scope is known.

Item	Price (USD)
Platform licence (3-year term)	450,000
Implementation	360,000
Integration allowance	120,000
Training	50,000
Support (3 years)	200,000
Total	**1,180,000**

Pricing assumptions

- Prices in USD.

- Integration allowance may be adjusted once scope is confirmed.

5. Security, Compliance and Risk Controls

Orbit Digital is ISO 27001 certified and encrypts data in transit and at rest. Access is role-based, and security events are logged. We conduct periodic security reviews.

6. Support, Experience and References

Orbit Digital has completed fourteen supplier-management implementations since 2013. Named references: Aldergate Shipping (2024), Pinecrest Foods (2023), Corvus Manufacturing (2022), Lakeshore Retail (2021) and Tidewater Logistics (2020); contact details are provided in the appendix.

Support is available weekdays 08:00-18:00 with a four-hour target response for urgent issues, and a named delivery partner.
